

Nepenthes spectabilis x *aristolochiodes*

Catalogue Description

The female parent is a truly exceptional giant form of *Nepenthes spectabilis*. Pitchers have strong characteristics of *Nepenthes aristolochiodes* with rich dark mosaic patterning. The plant has the robust characteristics of it's female parent.

Native Area

Created in Borneo Exotics' nurseries. Pollinated 2nd March 2005, harvested 24th June 2005.

Cultivation Conditions

Highland

Available Varieties

BE-3180

This lovely new hybrid was produced by pollinating our best ever giant form of *Nepenthes spectabilis* with the most vigorous *Nepenthes aristolochiodes* in our collection. Plants are a random selection from 5 clones and are more vigorous and tolerant than either of the parent species.
